Average daily revenue by month

Overview Insights

Entire home & apartments listings earn more per night, but with a lower occupancy rate.

Pricing from **€150** and above, significantly generates more revenue.

Optimal pricing balances daily rate and occupancy to maximize total revenue.

Business Recommendations

Key findings and actionable recommendations to drive higher occupancy and revenue.

TOP FINDINGS

Faster host response leads to higher occupancy

Higher review scores drive more bookings

High-priced listings perform best in terms of revenue

RECOMMENDED ACTIONS

Improve Response Time

Encourage hosts to respond within an hour to maximize occupancy.

Impact: +4 percentage points in occupancy rate.

Encourage Higher Review Scores

Support hosts in delivering great experiences to achieve review scores above 4.5.

Impact: Improvement in occupancy rate for top-rated listings.

Optimize Pricing Strategy

Review high & medium-priced listings for optimal performance.

Impact: Better occupancy in this category will lead to maximum revenue.

KEY TAKEAWAY

Focus on fast response times, excellent guest experiences and optimized pricing to maximize occupancy and revenue. Small improvements in these areas can lead to significant business impact.
